Bogenfuchs - Wilhelmstr. 16 - 35037 Marburg

To find the correct spine arrow, cross reference the desired arrow length with the draw weight of your bow.

Be sure to use the correct column for RECURVE bows and COMPOUND bows.

Notes:

- R = Recurve (When 2 sizes are shown, use the "R" selection for recurve bows)
- Compound bow weights are the peak draw weights measured in lbs.
- Compound bow arrow spine selection is based on using a release aid. For finger shooting, and 5lbs bow weight.
- Recurve bow weights are measured at full draw.
