1311 Cedar 5/16	26, 28, 30	
1310 Cedar 11/32	28, 30	

## ARROW BUYING INFORMATION

### SHAFT

**Cedar.** Straight, light & consistent spine. Provides the best overall shooting experience w/ typical youth & target recurve bows.

**Hardwood.** Our most economical wood shaft. Not as straight as cedar but more durable. A good choice for schools & camps using recurve bows.

**Aluminum.** Straight, light & consistent spine. Provide a good shooting experience but probably the least durable.

**Fiberglass.** Very economical & extremely durable. Heavier than wood & aluminum arrows. Ideal for archery programs on a limited budget.

### FLETCH

**Feathers.** Provides the best overall shooting experience. Light weight & forgiving. Not good in rain. Ideal for recurves, long bows or any bow w/ a shelf rest.

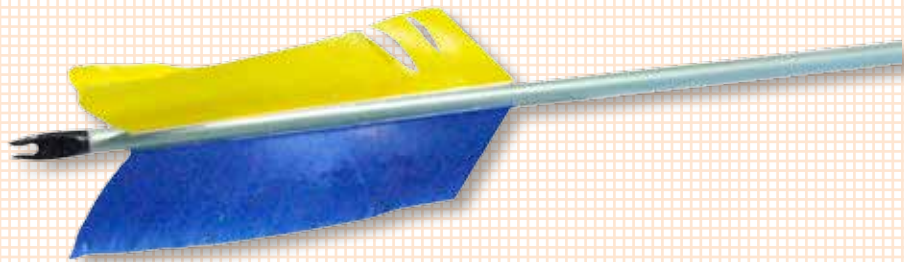

**Plastic vanes.** Very durable. Heavier than feathers & not as forgiving on most youth bows. Impervious to moisture. Recommended for compound bows w/ 2 pin, drop or similar rests.
